HOW TO EARN MONEY:

Earn credits:

- On day one after joining the cash links will not be available for you. So, you should try to earn some credits on day one.
- To earn credits click start surfing on the top of the account page indicated in red color or click start surf button that will be available above your account balance.
- The advertisement will load once you click start surf button. You have to stay in that page for 20 seconds.
- Once the timer completes, 5 pictures will load. You should click the repeated pictures to get credited.
- After clicking the correct image, click next site to earn more credits.
- You can earn credits as much as you can per day. But, you should surf at least 10 ads to get referral commission.
- These credits can be used later to get your page or referral link here, where other members will look at your page when they surf. This is the best chance to get some refs for other PTC or Revenuesharing sites.
- Once you accumulate certain amount of credits assign those credits to display your website or

referral url. By this you can get some free visitors to your website or you will get chance to get some refs for other PTC sites.

SUMMARY

Please see current image of Trafficmonsoon Statistic to validate the strategy being shared with you that is currently being used and improved on daily...

Current Trafficmonsoon Statistical Image

Please pay special attention to the boxed area in red as seen in the image above.

A] As seen in the image above, I currently still used the minimum shares required to achieve the basic \$10 profit per 1-2 days however, If you want to increase the amount of cash returns received daily as I do occasionally, then simply increase the amount of shares being used..

B] Please also note that you can start step 3 with the minimum 10 referrals, but as time pass, always aim to improve on the minimum to gain better success with this strategy being used as seen above. Additionally, you can then used the cash accumulated on your TM account to start purchasing adpack shares as I did when I just started off my Trafficmonsoon business. If you are dedicated to the strategy, you really don't have to invest a cent out of your pocket however, if you

required fast cash profit returns (as I know most of you do), I then recommend going ahead and simply purchasing your shares to speed up the process of earning with this system..

C] One key thing I must advice that if you plan on working this strategy alone without referrals then you have to increase your adpack shares however, to achieve a real effective system I highly recommend having referrals working with you on the site and you will then see the real true benefits of this system as I am seeing. Additionally when using step three to get new referrals via forum, every so often you must bump your thread back to the top based on the bump rules stated on the forums websites. This will cause new members to see your TM deal first and choose to join up with you.. Also avoid spamming on these said forums as your account may be banned for this... Be sure to make your deals interesting, enticing and irresistible to your audience.. Look at what is being offered, and make a counter deal that beats all else..

Good Luck

Best Regards
